VEHICLE DESCRIPTION FLASH CARDS

OBSERVATION SKILLS

WISE WITH YOUR EYES

These flash cards are an important part of teaching be wise with your eyes.

These license plate flash cards are a great tool when teaching about numbers and letters of a plate, color of a plate and what state the plate is from.

You can use the cards in various ways:

- You can simply show a card to the students and explain each plate and the details about the license plate. Also, some vehicles may also have a plate in front and in the rear.
- You can also display the flash card to the students, then hide it. Ask the class what they remember about the license plate.

These cards are very flexible in the lesson.

Situation When children observe or are involved in stressful situations, they tend to forget minor details that could potentially help find the subject or vehicle involved in the incident.

Solution: If it is safe to do so, the threat is gone, the child can use a rock to scrape the License Plate and vehicle description on a sidewalk. Then bring an adult or police to obtain the info. This will help with memory loss and mixing of details.
